

DIY 3L Calibration pump

We build a 3 liters pump using a $\phi 100\text{mm}$ PVC tubing, a $\phi 8\text{mm}$ copper pipe and then 3D printed around 2 screw caps and a piston.

Piston:

- Piston.stl
- Nut.stl
- Ferrule.stl

Cap:

- Vis.stl (x2)
- EndCap.stl
- Embout.stl
- Embout1.stl

Final rendering:

PVC + Vis

Piston assembled
